INDUSTRIAL MARKET OVERVIEW

National

- The industrial vacancy rate for the overall U.S. market decreased 10 basis points from 4.8% in Q1 2018 to 4.7% in Q2 2018. We foresee vacancy rates to start climbing slightly due to the number of buildings under construction and expect slower absorption going into the end of the year.
- Absorption of industrial space for the first half of 2018 was 135 million SF, which is down slightly from 142 million SF for the first half of 2017.
- Deliveries of new space were 11% higher in Q2 2018 than Q2 2017. New construction volume rose 16% from a year ago, with 325 million SF of space under construction. DFW leads the nation currently, with 27.9 million SF under construction. Atlanta beat out the Inland Empire for the most deliveries in Q2 2018 with 5.6 million SF.
- Due to the amount of industrial space under construction and a slowdown in absorption, there are concerns of oversupply of space. We anticipate this trend to cause a slowdown in construction starts in early 2019.
- E-commerce and big box needs are still driving a lot of new construction demand.
- The growing instant gratification culture is driving e-commerce companies to open smaller, last-mile locations in urban submarkets, to give them the capability to deliver within hours instead of days. This trend drives the need to repurpose older properties into distribution locations.

Dallas/Fort Worth

- The DFW Industrial market consist of 892.5 million SF, and 25.6 million SF is under construction. The total industrial market should eclipse 900 million SF by year's end.
- The first half of 2018 saw net absorption of 7.84 million SF and deliveries of 7.7 million SF. This continues to illustrate the balance between new supply and demand.
- The overall vacancy rate for DFW ticked down to 5.8% in the first half of 2018. This trails the national average, but remains historically low for the market. Due to the low vacancy rate, DFW experienced more than 7% year over year rental rate growth in the first half of 2018.
- Cap rates were slightly lower in the first half of the year at 7.12% compared to 7.85%. Sales volume has been trending down quarter over quarter from a peak in Q3 2017. Increasing rental rates and stable cap rates are rewarding owners for waiting and are off-setting rising interest rates currently.
- Looking forward, we expect the balance between new supply and demand to continue to support low vacancy rates, rising rental rates, and a healthy industrial market. Higher rental rates will support new construction as industrial development sites become more expensive to build upon, which should help maintain balance in supply and demand.

DFW INDUSTRIAL SUBMARKET OVERVIEW

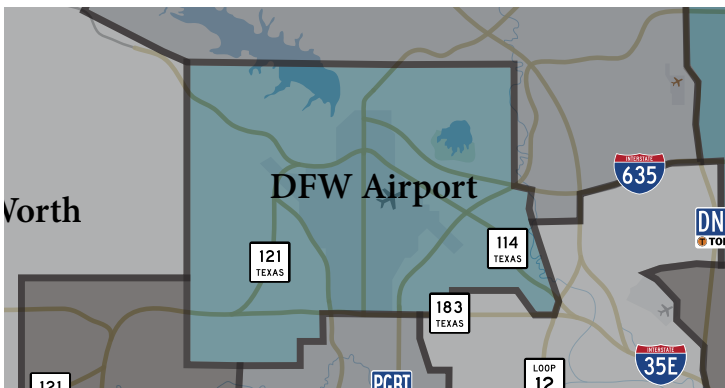

DFW Airport

- Warehouse construction has jumped 18% in the DFW Airport Market. Most of the building in the market is on airport grounds, where 12 developments, totaling more than 8 million SF, are underway or in the planning stages.
- Vacancy continues downwards causing a slight rise in rates. Included among the largest deals in the last few months are: The Container Store's renewal of its 1,211,000 SF warehouse in Coppell along with Best Buy's lease of 600,200 SF at 609 Enterprise Drive in Flower Mound.

Q2 2018

East Dallas

- Construction has remained active as 2.5 million SF is currently under construction.
- Elements International recently pre-leased IDI's new 487,200 SF building located at 2250 Skyline Drive in Mesquite. The building is scheduled for completion Q4 2018.
- Exeter is now under construction on their three-building, 977,050 SF spec development off of Buckner Boulevard. They recently signed a pre-lease and now have a tenant committed to taking 144,800 SF. The scheduled completion date for the project is Q2 2019.
- The fact that both of these developments were able to pre-lease spaces before delivery speaks to the continued growth and strength of the East Dallas submarket.

DFW INDUSTRIAL SUBMARKET OVERVIEW

Great SW/Arlington

- The demand for space in GSW is holding strong into Q3 2018 with a strong absorption of 3.4 million SF.
- A decreasing vacancy rate of 6.6% has pushed the average quoted rate up to \$5.32.
- Developers continue to be bullish in the GSW submarket with 2.6 million SF under construction.
- 2018 deliveries of 1.1 million SF pushed the total market size to 112 million SF.

Q2 2018

North Fort Worth

- There is continued demand for space in North Fort Worth with over ±2.7M SF of net absorption midway through 2018.
- Currently, North Fort Worth posts a vacancy rate of 3.7%.
- At the moment, there is approximately 4.5M SF of space under construction.
- An additional ±1.7M SF is expected to be announced with construction commencing in the fall of 2018.
- Ceva Logistics, Black & Decker and XPO are several of the groups who have taken down big blocks of space in 2018.

DFW INDUSTRIAL SUBMARKET OVERVIEW

Northeast Dallas

- The Northeast Dallas submarket has continued to be very healthy with a vacancy rate of 5.8%.
- There is currently over 2,500,000 SF under construction. Despite all of the construction activity, absorption has continued to stay positive and vacancy rates have hovered around all-time lows for the past three years
- Two preleases were recently announced at the 764,761 SF spec development at Jupiter Miller Business Park in Garland. Quest Window Systems leased 327,600 SF and another undisclosed tenant leased approximately 100,000 SF.

Q2 2018

Northwest Dallas

- 2018 vacancy in the Northwest Dallas submarket increased slightly in Q1 to 5.1 million SF from 4.9 million SF in Q4 2017, but then dropped significantly in Q2 to 4.8 million SF.
- Rental rates continued their upward climb from their highs of \$6.40 SF in 2017. While rental rates were flat in Q1 2018, they quickly increased to \$6.63 SF in Q2 2018. We expect rental rates to continue to rise as the year progresses.
- During Q1 2018, the market had flat net absorption after the 1.1 million SF absorbed the previous quarter. However, Q2 2018 absorption roared back with almost 690,000 SF absorbed.
- So far in 2018, 11 buildings have delivered adding 400,000 SF to the market. There are another 14 buildings under construction totaling 2.1 million SF.

DFW INDUSTRIAL SUBMARKET OVERVIEW

South Dallas

- The South Dallas submarket had a very strong year in 2015 absorbing 2,228,783 SF.
- It is ramping up to become one of Dallas's largest submarkets with an overall net delivery of 2,743,213 SF.
- Trends indicate rental rates will continue to increase until construction projects reach delivery. Build to suits have taken more prime development sites, and this will only continue to grow, especially for Fortune 500 companies in need of industrial warehouse space. Duke Realty built three build-to-suits in 2017 alone. Duke built a 556,000 SF deal for Shippers Warehouse, an 875,000 SF project for Wayfair, and a 500,000 SF complex for Katoen Natie.
- It will be interesting to see how South Dallas expands and continues to grow in the near future.

11.4%
VACANCY
RATE
Q2 2018

South Fort Worth

- The South Fort Worth submarket held steady for the second quarter in a row showing positive absorption of 41,252 SF.
- The number would have been significantly higher were it not for Majestic delivering their first building of their South Fort Worth project with a 287,261 SF completion.
- Vacancy in South Fort Worth increased for the first time in over one-half year growing by 0.3% to 5.4%, inching toward a more normal vacancy. From Q2 2016 to Q4 2017, the submarket showed mid-to-high 3% vacancy. A healthier South Fort Worth seems imminent.
- Rental rates increased by approximately 5% from the third quarter
- Bob Mills Furniture delivered a two building, multi-tenant for sale or lease project off Long Avenue in Fort Worth in the second quarter.

DFW INDUSTRIAL SUBMARKET OVERVIEW

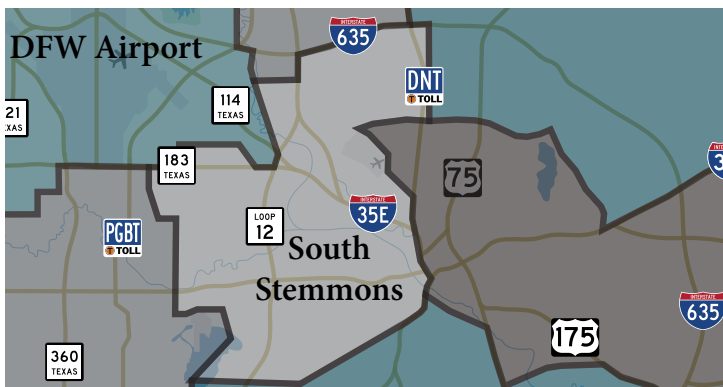

South Stemmons

- The South Stemmons submarket is seeing close to an all time low vacancy rate of 6.3%: Brookhollow (1.7% vacant), Hines (2.5% vacant).
- The largest amount of vacancies exist in the Lonestar/ Turnpike business parks, which includes the vacant former 4 million SF Vaught Aircraft facility along Jefferson Boulevard, although this facility is planned for redevelopment.
- The overall low vacancy rate for South Stemmons can be attributed to the lack of development and/or developable sites.
