

OFFICE MARKET OVERVIEW

MAX LAPKE, *Senior Associate*

As tenants continue to investigate options to right-size their offices, vacancy rates resume their increase throughout the market. The market has experienced an annual absorption of negative 2.2 MSF, the largest occupancy loss in a decade. Kansas City still falls below the national average in office vacancy with a YTD rate of 11.51% compared to the national average of 13.18%. The availability of sublease space has increased to approximately 2.0 MSF currently available. Sales volume in the market has been lackluster, reaching only \$134 million over the past year. The low sales activity can be attributed to increased interest rates, higher vacancy, and a significant price disparity between buyers and sellers. Development interest has slowly started to return with approximately 1.08 MSF of property under construction YTD.
